DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 25-26 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The applicant has failed to provide sufficient written disclosure for one of ordinary skill in the art to provide a cutout formed by a groove, whereby the leading edge of the groove extends forward to about “longitudinally” midway through the front half of the padding layer or that the groove is approximately one inch wide at location midway between the front and back ends of the frame of the bicycle saddle, without undue experimentation or burden.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 25 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 25, the phrase “said leading edge of said groove extending forward to about **longitudinally** midway through said front half of said padding layer”, is unclear and confusing as it appears that the leading edge of the “scrotum channel” actually extends forward “longitudinally” midway through the front half of the padding layer. Applicant needs to clarify.

Response to Amendment

5. The declaration under 37 CFR 1.132 filed 10/13/06 is insufficient to overcome the rejection of claims 25-26 based upon 112 first paragraph (non-enabling) as set forth in the last Office action because: Although statements were presented to state that the specification was enabling by employees of the assignee, the examiner maintains position that the specification is still not entirely clear to “one of ordinary skill in the art” without some “undo experimentation”. Furthermore there appears to be a lack of proper antecedent basis for the statement “said leading edge of said groove extending forward to about **longitudinally** midway through said front half of said padding layer”. Applicant is directed to the above rejection under 112 second paragraph.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
